

Danish Cardiovascular Research Academy

PhD-Scholarship in basic or clinical cardiovascular research at the University of Southern Denmark

Danish Cardiovascular Research Academy (DaCRA) is a national graduate school aimed to stimulate research and PhD training specifically within cardiovascular sciences. For further information about the Academy, see the web site www.dacra.dk. A PhD scholarship is available for a qualified applicant from 1 September 2006. This scholarship is financed with 1/3 from DaCRA, 1/3 from the University of Southern Denmark and 1/3 from third parties, which should be provided by the applicant.

The applicant's research project should be within basic or clinical cardiovascular research.

The salary will be in accordance to the Agreement between the Danish Confederation of Professional Associations and the Ministry of Finance. The applicant should have a background in medicine, biomedicine or similar. The master's degree should be obtained before the PhD scholarship begins. It is required that the applicant is enrolled as a PhD-student and follows the study programme required for achieving a PhD-degree within 3 years.

The PhD programme is to be completed in accordance with the Ministerial Order for the PhD programme and degree of the Ministry of Science, Technology and Development, and the Regulations and Guidelines defined by the University of Southern Denmark (<http://www.sdu.dk/health/download/phd/eindphd.pdf>). The letter of application should include information about the specific project proposed, curriculum vitae and a financial plan. It should be explained why the research project is of interest for you and why you are particularly qualified for the scholarship.

Further information can be obtained from professor Ole Skøtt, Physiology and Pharmacology, Winsløwparken 21, 5000 Odense C (phone 6550 3752; oskott@health.sdu.dk). Application in 5 copies marked "Cardiovascular PhD" should be received by the Faculty of Health Sciences, Winsløwparken 19, DK-5000 Odense C, not later than noon 7 June 2006.
